Learning as it happens

Learning how it happens

Discussion

A causal mechanism in reverse:

$$(\sigma_i = \sigma_j) \Rightarrow (i = j) \Rightarrow (\omega_{ij} = 0)$$

and a lot more

- $p_E(\sigma_i = \sigma_j) = \frac{1}{2}(1 + p(i \leftrightarrow j)) \geq \frac{1}{2}$
- $p_{E \cup D}(\sigma_i = \sigma_j) \geq p_E(\sigma_i = \sigma_j)$
- $\sigma_+ \uparrow$ with time
- ...

Learning as it happens

Learning how it happens

Discussion

How about learning?

$$p(\omega_{ij} = 1 | \omega_{(ij)}) = \begin{cases} p & \text{if } i \leftrightarrow j \\ \frac{p/2}{1-p+p/2} & \text{if } i = j \\ & \text{if } i, j \in E \setminus \{ij\} \end{cases}$$
