Teachers changing the world of schooling

Kulyash Shamshidinova
Nur-Sultan, 24 October 2019

Global Trends Shaping Education (OECD, 2019)

Each of these trends is caused by the rapid development of technology.

Shifting global gravity

- The global balance of economic power is shifting towards Asian economies
- The global market expands, human mobility increases
- Consumption grows due to expansion of the global middle class
- New AI actors emerge

Social development

- The rights of migrants, linguistic and religious minorities are provided for in legislation
- Voter turnout have fallen in OECD countries
- The role of individual regions and cities is strengthening
- Quality of education in rural areas is still relevant

Security

- Cybercrime is growing
- The number and scale of worldwide natural disasters is increasing
- Increased bacteria resistance
- The number of traffic accidents is reducing
- Probability of living in a country in an armed external conflict significantly decreased

Life expectancy

- Life expectancy is increasing
- The potential for loneliness is increasing
- Years in retirement increased
- Digital elders

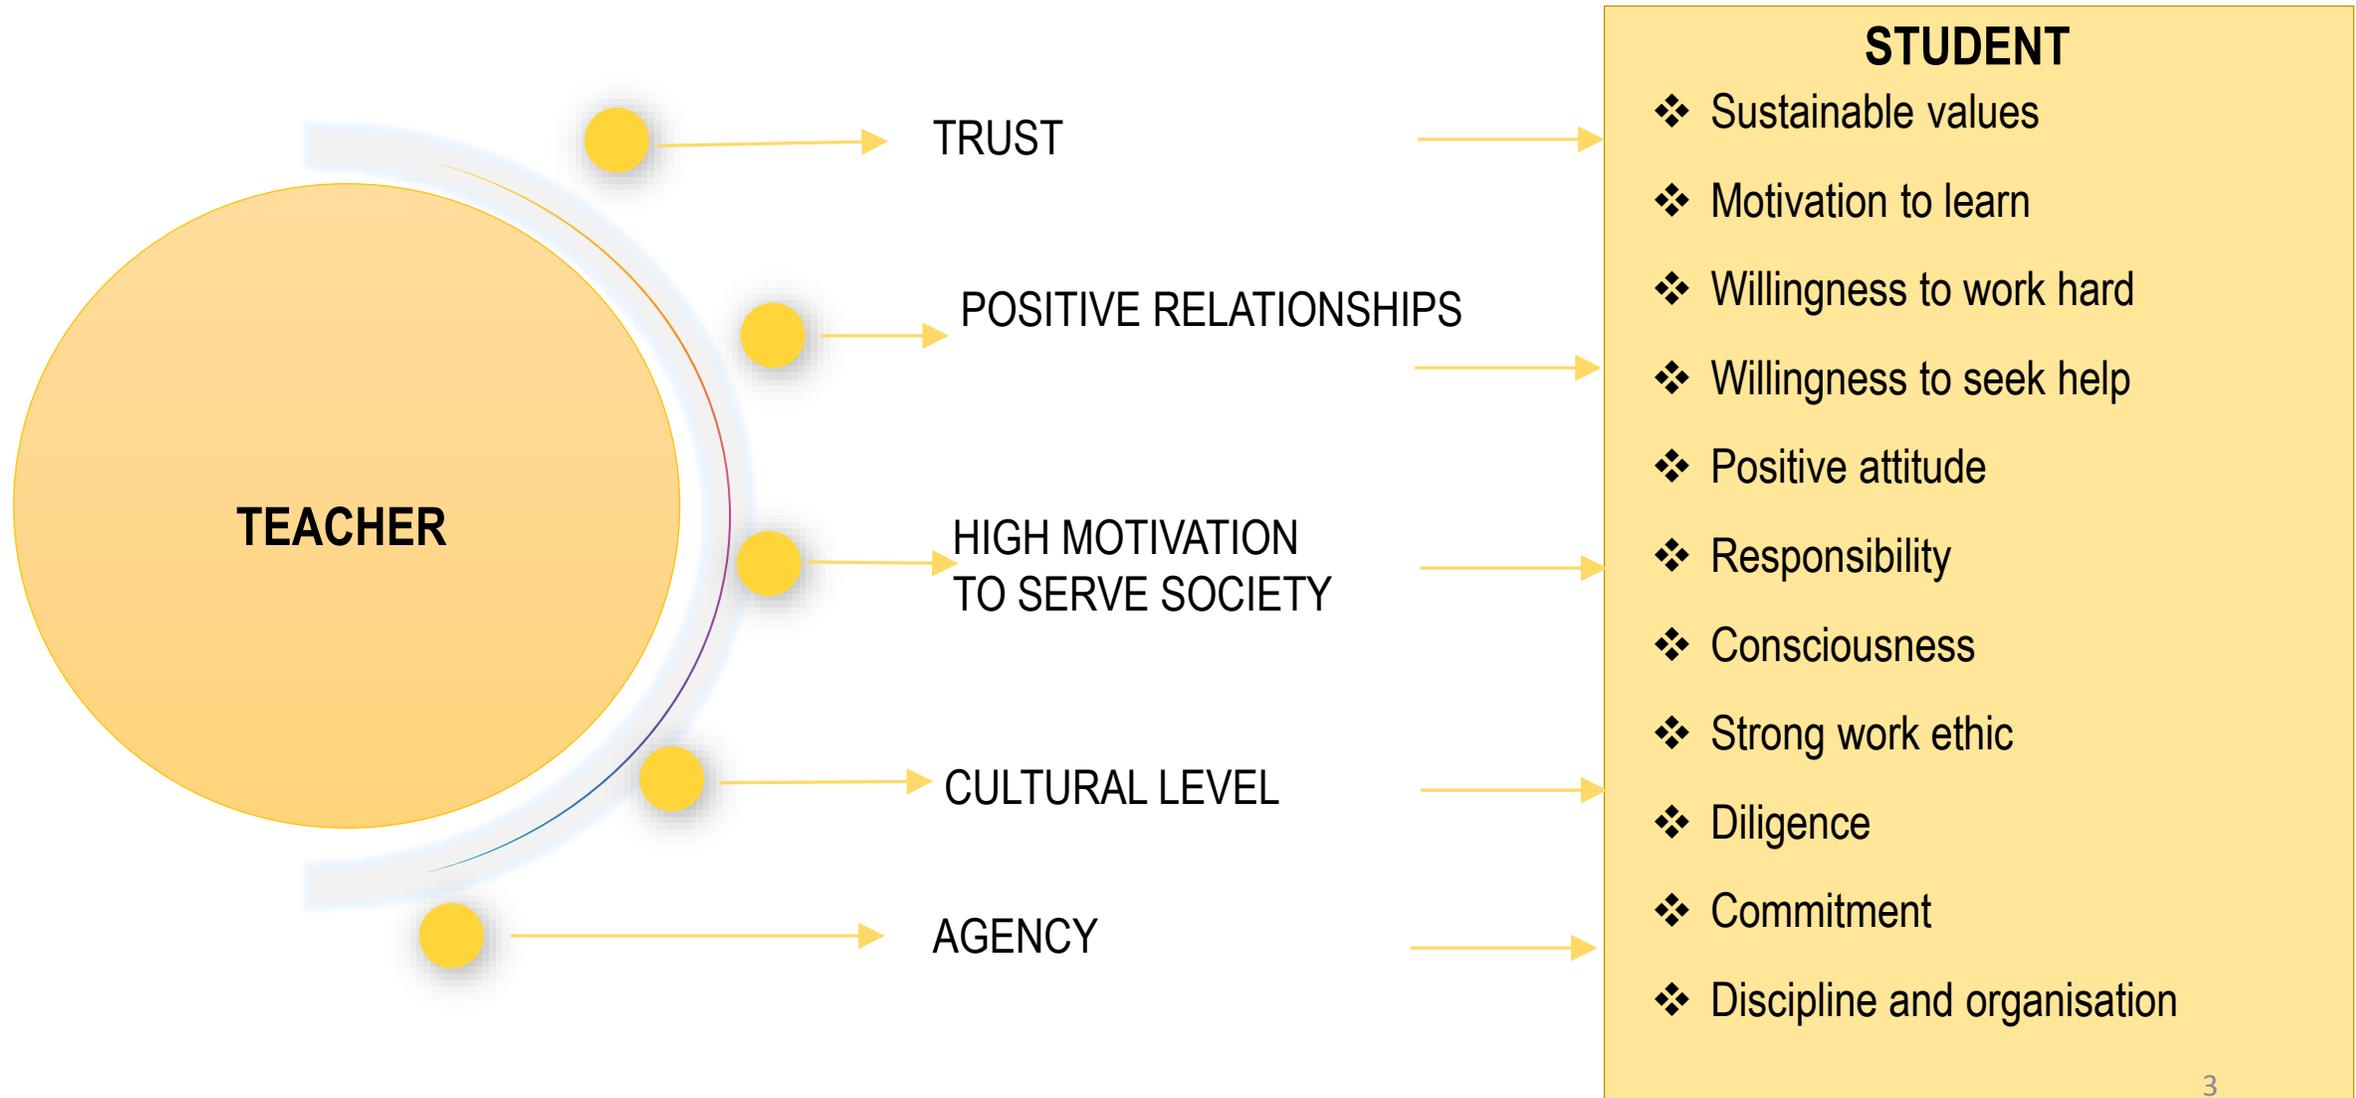

Modern culture

- The difference in income between men and women reduced
- Increased Internet access
- The number of freelance workers is growing
- Mass consumption becomes ethical
- Virtual becoming reality
- New family models and more active parenting from fathers

“...we live in the era of constant change... now every year is transformative...”

Yuval Harari

THE TEACHER – IS A LEADER, WHO IS ABLE TO MAKE EFFICIENT USE OF TIME, REALISTICALLY EVALUATE TASKS, QUICKLY FIND THE BEST SOLUTIONS, SERVE THE SOCIETY AND TAKE RESPONSIBILITY.

The teacher is a force, and the professional team of teachers is a driving force that contributes to the development of schooling.

Collaborative professionalism based on a high level of trust in work relationships is the golden cell of professional collaboration. **In such an environment, teachers have strong relationships, trust each other and feel free to take risks and make mistakes.**

British scholar Andy Hargreaves, 2018.

Methodological support of mainstream school teachers

nationally

The cycle diagram of data provided to Intellectual schools based on the results of assessment during the school year

94% of reports is submitted to school, with the largest share of the data provided to the teacher (36%).

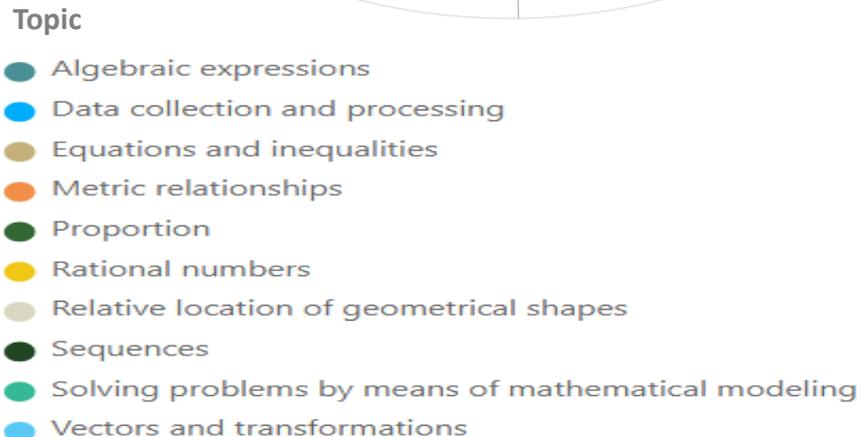

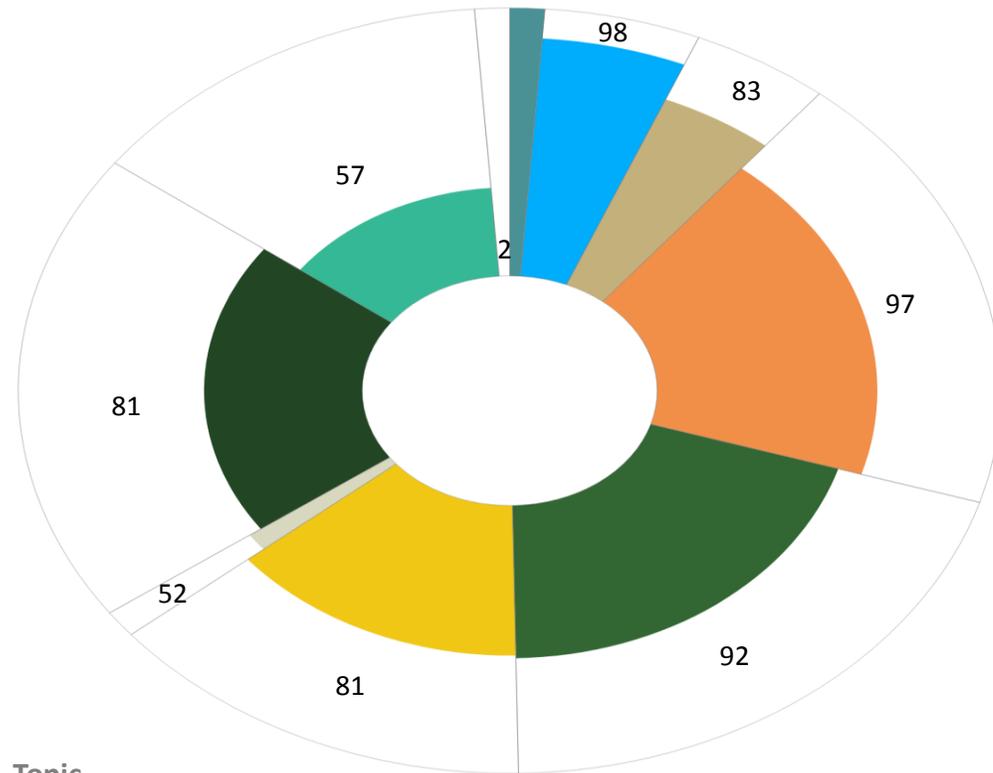

Data on students:

- Strengths
- Weaknesses
- Motivation
- Applied skills
- Interests, aspirations
- Behaviour, etc.

Data is used to ensure:

- Individual feedback
- Differentiation
- Guidance
- Engagement in learning

Using the results of monitoring to develop learning

The data is used to **ensure the dialogue between:**

- student and teacher
- teacher and parents
- teacher and teacher
- teacher and school administration

Data **contributes to:**

- differentiation and individualisation of the learning process
- selection of effective teaching methods

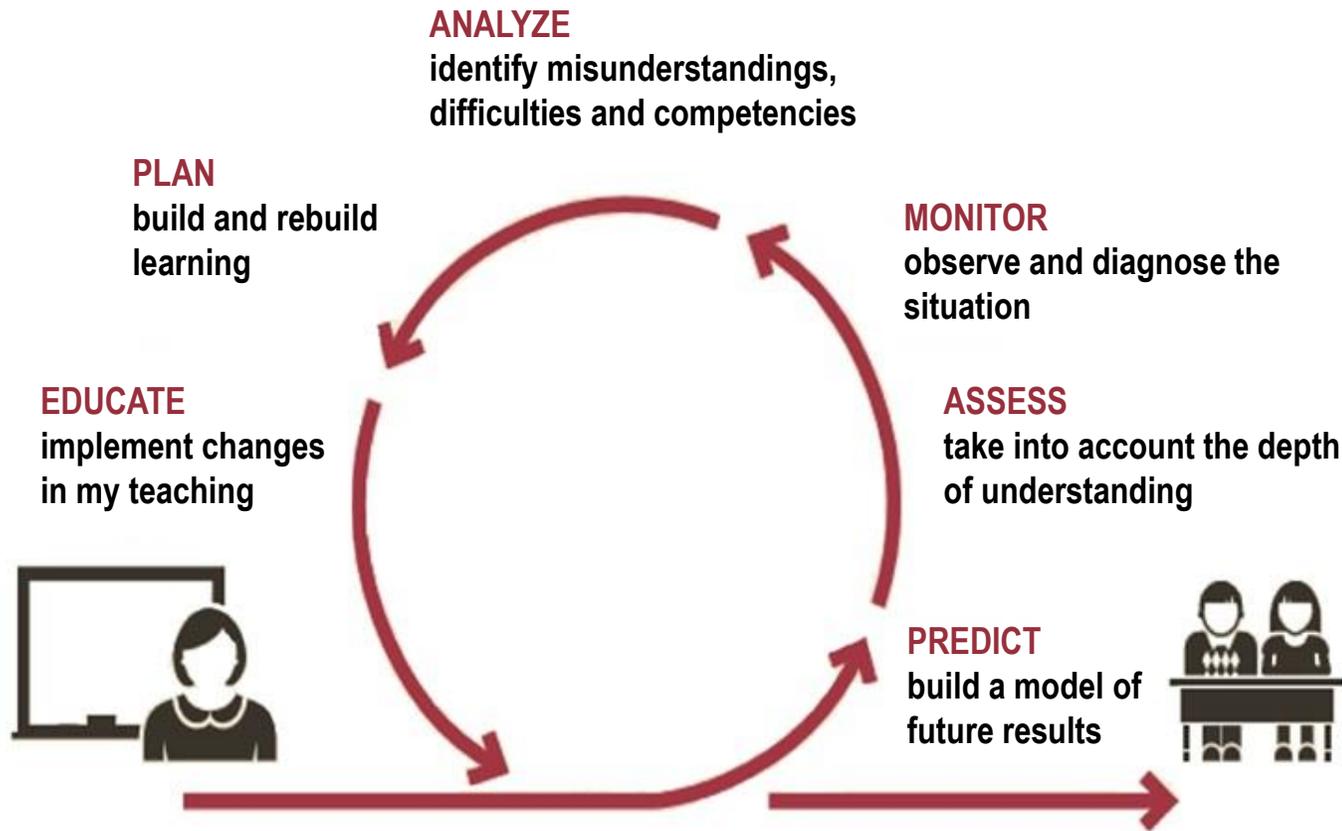

The data **leads to:**

- increased teacher agency
- **understanding the value** of feedback-based learning

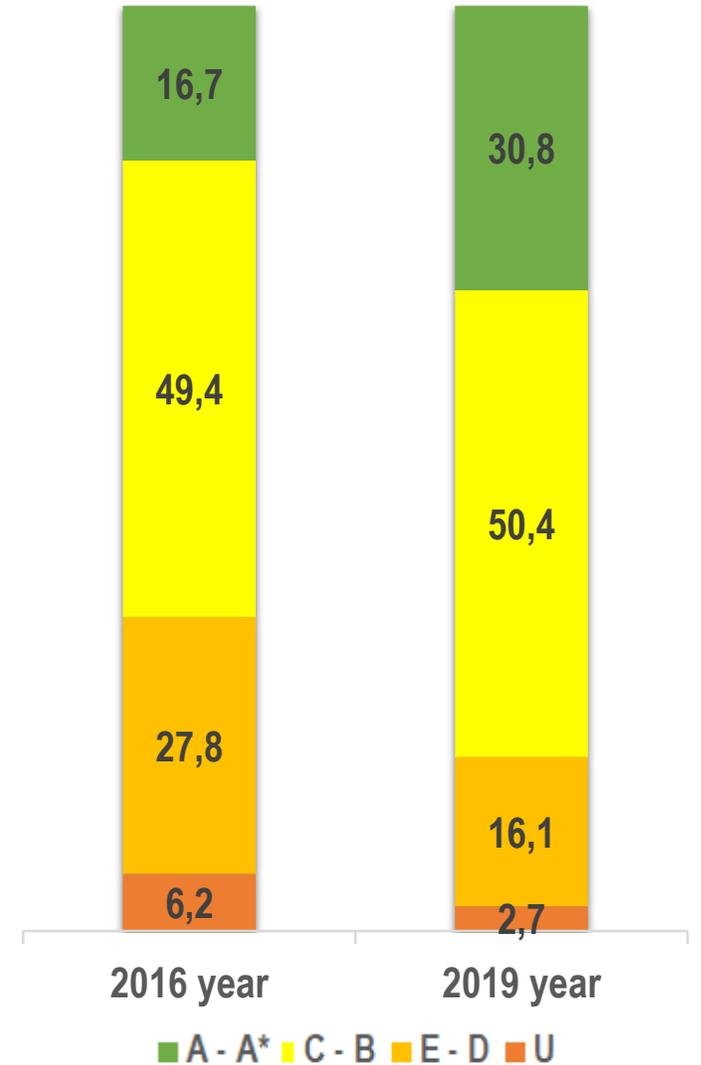

Data is **processed to:**

- identify the strengths and weaknesses of each school and individual student
- inform predictive analytics
